OUBLECK!

WHAT'S THAT, MATEO?

I MADE IT. SOME PEOPLE CALL IT "OUBLECK." IT SEEMS KIND OF LIKE A SOLID AND KIND OF LIKE A LIQUID.

IT'S SO WEIRD, THAT SMART DUDE EINSTEIN STUDIED IT.

HOW DO YOU MAKE IT?

YOU MIX 1/2 CUP OF WATER WITH 4 HEAPING TABLESPOONS OF CORNSTARCH IN A CUP

MINE'S NOT THE SAME AS YOURS. IT JUST SEEMS LIKE A LIQUID.

Try adding a little more cornstarch. But if you add too much and it gets too dry, add a little water.

OH MAN, CHECK IT OUT! TRY POKING IT HARD AND FAST WITH YOUR FINGERS. THEN TRY IT AGAIN, BUT SLOWLY.

ISN'T THAT WEIRD? HEY, TRY MAKING A BALL OUT OF IT.

THIS IS INTERESTING STUFF. HOW DID YOU KIDS GET TO BE SO SMART ABOUT SCIENCE?

YEAH, WE'RE LIKE EINSTEIN TIA AND I THINK MY BRAIN JUST GOT BIGGER!

NAH, I THINK THAT'S JUST YOUR HAIR.

SO WHAT? Investigating this strange substance helps us learn about different solids and liquids, and also how scientists do investigations.
