

Notes & Inspiration Space for “*Biotech Science Wand*” Activity

Problems

- What problems might biotechnology solve?
- What problems in the world are important to me?

Example:

Pollution is important to me. Maybe biotechnology could be used to make things that break down naturally.

Life Parts and Processes

- What are living things made of? How do they work?
- What science ideas feel important to me?

Example:

Living things are made of cells, but even those cells have smaller parts that work together.

Use this sheet to write or sketch your ideas or questions or things you are learning
