

K-12 Network for Advancing AI Literacy in Education

Shape AI literacy and competency with peer district leaders. Don't scramble alone or settle for one-size-fits-all commercial solutions. Join a trusted network powered by The Lawrence Hall of Science, where your team co-designs the tools and strategies that work in real K-12 classrooms.

Who Should Apply?

We serve three district segments – leveraging the power of the AI-Luminate network to advance capacity of your district:

- **Emerging Innovators** (limited to no instructional technology infrastructure or AI strategy)
- **Growing Adopters** (growing district capacity for instructional technology and AI planning)
- **Advanced Implementers** (established AI strategy, technology, tech-equity leadership, & infrastructure)

Whether you're starting up or scaling up, we meet you where you are.

Why This, Not That?

- **DIY Scramble:**
Districts juggle vendor webinars, one-off pilots, and reactive tool roll-outs.
- **Big-Box “AI Platforms” without tailored support:**
Generic, off-the-shelf subscriptions that ignore your unique district contexts and equity challenges.

AI-Luminate Network

A focused, networked approach that blends the Lawrence's peer district-learning model with hands-on planning support and consultation, policy co-design, expert insights, and customized technical support.

Next Steps

- [Submit your interest form](#) by August 30, 2025
- Assemble a core district team (Recommended team: Superintendent, 1 curriculum & instruction lead, 1 STEM lead, 1 tech lead, disciplinary leads, 1-2 site administrators, 1-3 teacher leaders)

What To Expect: Program Feature → Purpose → Impact

Program Feature

Superintendent/Executive Learning Sessions (Virtual, Quarterly):

Cross-District Collaboration Forums (Virtual, Tri-Annual):

District Specific Strategy Sessions (Virtual)

AI-Luminate Advisory Roundtables (Virtual, Semi-Annual)

Purpose

Engage in strategic planning, policy guidance, and equity-focused visioning in 60 minutes.

Create your district's AI roadmap and prototypes - plans, rubrics, competencies, pilot results - and get feedback from peers and AI education experts.

Get support to implement your district's AI roadmap: professional learning with disciplinary leads, stakeholder engagement, competency tools, integration in STEM learning, etc.

Gather with AI and AI education thought leaders to shape your district's AI strategy.

Impact

Position your district as a K-12 thought-leader and align policy to practice.

Walk away with an adaptive AI-roadmap that covers procurement, professional learning, and stakeholder engagement.

Boost confidence, and classroom impact. No more ad-hoc experimentation and implementation.

Tap directly into cutting-edge insights to vet tools, anticipate risks, and secure partnership opportunities.

Core Benefit

Build educator, leader, and district capacity to integrate AI into teaching and learning in engaging, effective, and ethical ways. Ensure that your approach to AI integration advances understanding of real world implications!
